-----------------   FILE STRUCTURE   --------------------

Dshare/

  index.html → style.css

    - index.html: The main landing page for the application.

    - style.css: General styles applied to the application.

login.html → login.php

   - login.html: Provides the login form interface.

   - login.php: Handles login form submission (backend logic).

signup.html → register.php

   - signup.html: Displays the user registration form.

   - register.php: Processes user registration form submissions.

contact.html → submit_contact.php

   - contact.html: A contact form for users to send inquiries.

   - submit_contact.php: Processes and sends the submitted contact information.

upload-form.html → upload.php

   - upload-form.html: A form for file uploads.

   - upload.php: Handles the file upload process.

dashboard.php → styledashboard.css

   - dashboard.php: Displays the user dashboard interface.

   - styledashboard.css: Styles the dashboard page.

share_file.php

   - Handles sharing of uploaded files, likely used within the dashboard or upload-form.html.

logout.php

   - Logs out the user and clears session data.

available-files.php

   - Displays or retrieves a list of files available for download or sharing.

db.php

   - Manages database connections and queries (used internally by many other PHP scripts).
